

Dear Commissioner Friedman,

It is good to hear that the FDA is finally going to restrict the feeding of dead cows to live cows. It is unconscionable, however, that your new policy *fails* to take into account the dangers posed by feeding dead and diseased pigs, horses, and chickens to cows and other farm animals. *How many Americans will have to die from Mad Cow Disease (BSE) before the FDA stops this horrible and deadly practice?*

Why is this even done?
I join with the Humane Farming Association in calling for an immediate nationwide ban on the use of dead animals in livestock feed. *These animals are natural bacterias. The public will have to become so too. I'm afraid to eat meat.*
